

Deliver a personalized benefits engagement experience with ALEX ID.

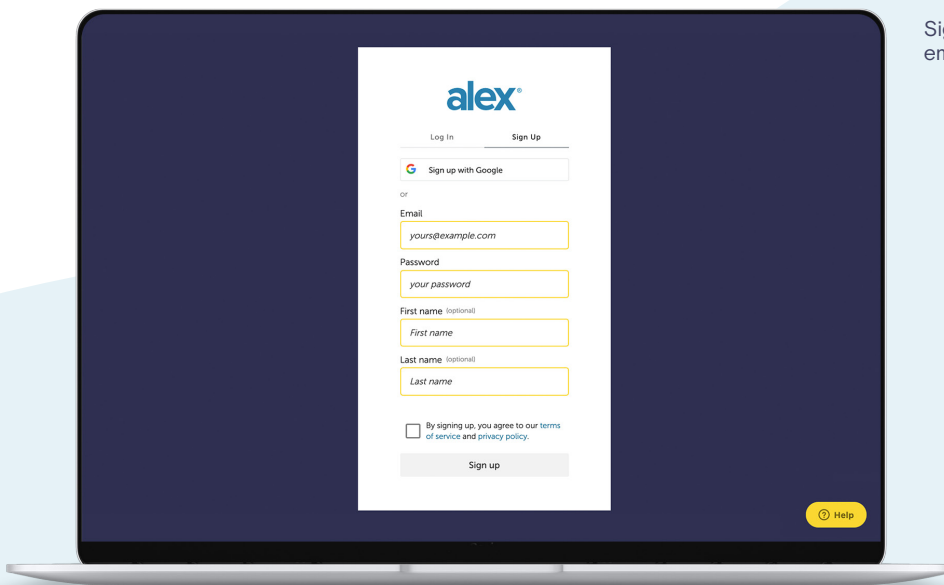

Employees love getting benefits guidance from ALEX—he helps them choose and use their best-fit benefits. With ALEX ID, employees can create an account that saves their information, streamlines their experience and fosters smarter choices as ALEX learns about them over time.

ALEX ID creates new opportunities for employee benefits engagement year round—opening the door to new possibilities like personalized messages and targeted reminders to help employees take cost-saving actions.

WITH ALEX ID, YOU CAN:

- ✓ Deliver enhanced personalization each time an employee interacts with ALEX
- ✓ Increase engagement with tailored messages based on past benefits choices
- ✓ Boost employee confidence in their benefits decisions as ALEX tracks their benefits journey
- ✓ Use single sign-on (SSO) to integrate ALEX into your core tools and ensure compliance with security protocols*
- ✓ Keep your employees' confidential information safe and secure with SOC2 compliance

ALEX learns about employees, leading to personalized recommendations. The result: a happier and healthier workforce.

Sign-up is easy and quick! Employees can provide an email and password or use an existing Google account.

In the future, would you be interested in any additional support for any of these?

- Diabetes
- Hypertension
- Cancer
- Mental health
- Maternity or fertility care
- Telemedicine or virtual care

Yes, just one of these.

Yes, more than one.

No, not interested.

Interested in offering employees ALEX ID?

Contact your Jellyvision Rep!

ALEX ID allows ALEX to follow-up to make sure employees are getting the care they need, when they need it.

*The ability to leverage SSO is only available with select packages.
